## Deerwalk Institute of Technology

# Deerwalk Aptitude Test (DAT) – BCA - Model Question - Class of 2028

Instruction

All questions are compulsory.

There are three major sections in this paper - English, Mathematics, and IQ. Each question carries 1 mark.

The marks wise distribution of each of the section is as follows:

Section	Subject	Marks	Time [Suggested ]
A	English	40	40
В	Mathematics	40	70
С	IQ	20	35

#### -Section A- English

#### **Reading Comprehension**

#### (This passage is extracted from an international economics magazine.)

In 1978, economist Thomas Robert Malthus stated in his 'Essay on the Principle of

Population' that population increases in a geometric ratio, while the means of subsistence increases in an arithmetic ratio.

However, Malthus's dire prediction of a precipitous decline in the world's population has not come to pass. The miscalculations in what has come to be known as the Malthus Doctrine are partly due to Malthus's inability to foresee the innovations that allowed vast increases in worldwide wheat production.

In the late nineteenth century, the invention of the tractor staved off a Malthusian disaster. While the first tractors were not particularly powerful, the replacement of animals by machinery meant that land that had been devoted to hay and oats could now be reclaimed for growth of crops for human consumption. Nevertheless, the Malthusian limit might still have been reached if crop yield had not been increased.

A natural way to increase crop yield is to supply the soil additional nitrogen. In in 1909, chemist Fritz Haber succeeded in combining nitrogen and hydrogen to make ammonia, the white powder version of which added to the soil, improves wheat production. Haber nitrogen, however, was not widely used until later in the twentieth century, largely due to farmers' resistance to spreading an unnatural substance on their crops. Haber's invention had a further drawback: if applied in incorrect quantities, the wheat crop would grow taller and thicker, eventually toppling over and rotting.

Interestingly, in the late twentieth century the discovery of genetic engineering, which provides a means of increasing rice and maize production, met with equal resistance, this time from the environmental movement. Even without direct genetic engineering, it is likely that science will discover new methods to improve agricultural production.

- 1. According to the passage, which of the following is true about Haber nitrogen?
  - Haber nitrogen is more effective at increasing yield of wheat crops than that of maize or oats.
  - b. Undesired effects can result from the application of surplus quantities of Haber nitrogen.
  - c. Haber nitrogen may not be effective if applied at an improper time in wheat's growth cycle.
  - d. Farmers were quick to adopt Haber nitrogen because it made their crops grow taller and thicker.
- 2. In the second paragraph, the phrase 'staved off' most nearly means:
  - a. Supported
  - b. Speeded up
  - c. Saved
  - d. Risked
- 3. What was the dark prediction speculated by the economist, Malthus?
  - a. World's population will continue to grow
  - b. World's population will decrease sharply
  - c. There will be mismatch between geometric and arithmetic ratio
  - d. There will be innovations to withhold the increasing population
- 4. The final sentence of the passage offers:
  - a. A synthesis of the ideas given above
  - b. A consolation on future prediction
  - c. A warning for the future
  - d. A conclusion for the whole passage
- 5. According to the passage, the three inventions of the tractor, nitrogen and genetic engineering were initially taken as:
  - a. The first invention was welcomed but two others were rejected
  - b. The first two inventions were welcomed but the last one was rejected
  - c. All three inventions were welcomed
  - d. All three inventions were rejected

- 6. The passage implies all of the following except:
  - a. World food production has kept pace with world population growth.
  - b. Technological innovation is one factor that allowed for an increase in crop production.
  - c. A Malthusian disaster would have been ensured if it were not for the invention of genetic engineering.
  - d. Farmers are not the only group that has opposed artificial efforts to increase crop yield.
- 7. Initially, the Haber nitrogen was taken as:
  - a. An exciting invention for the growth of the crops
  - b. A harmful substance to their crops
  - c. A substance that could have much potentiality
  - d. An invention with appreciation
- 8. The content of the given passage is:
  - a. Narrative
  - b. Descriptive
  - c. Expository
  - d. Persuasive
- 9. Given in the first paragraph, the word 'doctrine' is closest in meaning to: a. Principle
  - b. Assumption
  - c. Threat
  - d. Guidance
- 10. In the given passage, there is the sequence of:
  - a. Logic-1, logic-2, logic-3 and conclusion
  - b. Introduction—supporting details—and conclusion
  - c. Introduction of the problem—logics—conclusion
  - d. Introduction of the problem—logic-1, logic-2, and logic-3.

# **Sentence Completion**

11.	Despite	e whatphilosophies of child-rearing suggest, there is no imperative that the
	day-to-	day action of raising a child be simple, unambiguous, and unchanging. It ensures that life
	follows	s philosophy.
	a.	Aggressive
	b.	Random
	c.	Shameless
	d.	Systematic
12.	All the	greatest chess players in the world know that it is folly to bewhen facing a
	formid	able opponent, as stubbornness will almost surely lead to mistakes that force a player to
		to the prevailing strategy of their opponent.
	a.	Finicky—dissent
	b.	Obdurate—capitulate
	c.	Vituperative—repudiate
	d.	Flexible—dismiss
13.	Althou	gh pirating software, such as borrowing a friend's copy of an installation CD or
	downlo	pading software from unapproved sources is, many people continue to do so
		, almost as if they were unaware that such acts amount to theft.
	a.	Illegal—unabashedly
	b.	Uncommon—savagely
	c.	Difficult—sensibly
	d.	Easy—nicely
14.	Having	squandered his life's savings on unprofitable business ventures, the
	entrepr	eneur was forced to live in squalor.
	a.	Former
	b.	Unlikely
	c.	Insolvent
	d.	Eccentric

15.	Owing	to a combination of its proximity andatmosphere, Mars is the only planet in
	our sol	ar system whose surface details can be discerned from Earth.
	a.	Viscous
	b.	Estimable
	c.	Copious
	d.	Meager
16.	Long to	erm governmentare known as gild-edged securities.
	a.	Bonds
	b.	Securities
	c.	Shares
	d.	Equities
17.	Futures	s, options and otherexist in order that companies and individuals may attempt to
	diminis	sh the effects of future changes in commodity, asset prices, exchange rates and interest
	rates.	
	a.	Derivatives
	b.	Divisions
	c.	Deviations
	d.	Denunciations
18.	Specul	ations, anticipating currency appreciations or, or interest rate movements, are
	active i	in currency future markets.
	a.	Derivations
	b.	Hedging
	c.	Depreciations
	d.	Overestimations
19.		exists when products are homogenous, and there are a great many firms too small to
	have an	ny influence on the market price.
	a.	Monopoly
	b.	Monopsony
	c.	Monolithic competition
	d.	Monopolistic competition

in the	economy to create jobs?
a.	Intervene
b.	Urge
c.	Stimulate
d.	Encourage
<b>Sentence Com</b>	pletion
21. Democ	eracy: government:: meritocracy:
a.	monarchy
b.	aristocracy
c.	bureaucracy
d.	leadership
22. Hypoth	nesis is to experiment as thesis is to:
a.	research
	conclusion
c.	analysis
d.	evidence
23. Shakes	peare is to literature as Picasso is to:
a.	painting
b.	sculpture
c.	architecture
d.	photography
24. Dirge:	Funeral
a.	chain: letter
b.	bell: church
c.	telephone: call
d.	jingle: commercial

20. When there is high unemployment during a recession, should the government ......

#### 25. Depressed: Sad

- a. neat: considerate
- b. towering: cringing
- c. rapid: plodding
- d. exhausted tired

#### 26. Bristle: Brush

- a. arm: leg
- b. recline: chair
- c. stage: curtain
- d. key: piano

#### 27. Rain: Drizzle

- a. swim: dive
- b. hop: shuffle
- c. walk: run
- d. run: jog

#### 28. Pulsate: Throb

- a. tired: sleep
- b. walk: run
- c.
- examine: scrutinize
- d. ballet: dancer

#### 29. Cobbler: Shoe

- a. jockey: horse
- b. contractor: building
- c. mason: stone
- d. cowboy boot

## 30. Umbrage: Offense

- a. confusion: penance
- b. infinity: meaning
- c. decorum: decoration
- d. elation: jubilance

#### **Grammar and Vocabulary**

- 31. 'The rest is history' means:
  - a. history takes rest
  - b. known to everyone
  - c. avoid historical facts
  - d. history repeats itself
- 32. 'Warm as toast' means:
  - a. very hot
  - b. very fresh
  - c. lukewarm
  - d. cold
- 33. 'To smell a rat' means:
  - a. to suspect a foul play
  - b. to show cleverness
  - c. to investigate in detail
  - d. to start a fight
- 34. What ......(happen) if Pandora had not opened the box?
  - a. happened
  - b. had happened
  - c. happen
  - d. would have happened
- 35. The collective noun for horses is:
  - a. a flock of horses
  - b. a herd of horses
  - c. a stud of horses
  - d. a troop of horses
- 36. A study of aging people is called:
  - a. demography
  - b. Numismatics
  - c. gerontology
  - d. ornithology

37.	He is a	studentTribh	uvan University.					
	a.	on						
	b.	in						
	c.	at						
	d.	of						
38.	Sincer	e people abide	the rules and regulatio	ns.				
	a.	by						
	b.	of						
	c.	at						
	d.	on						
39.	Let's h	ave lunch together,	? Supply the cor	rect question tag.				
	a.	will you?						
	b.	shall we?						
	c. won't you?							
	d.	do we?						
40.	I replie	ed that I was working.	The question was:					
	a.	What were you doing	?					
	b.	What you are doing?						
	c.	What are you doing?						
	d.	What had been doing	?					
			-Section B- Mathem	<u>natics</u>				
1. I	For wha	t value of k, the equation	on $x^2+2(k+2)x+9k=0$ ha	s equal roots?				
	;	a. 1or4	b. 1or3	c. 2or3	d. 2or1			
2. 7	The fund	ction given by f(x)=xsi	nx+cosx is a					
	;	a. odd	b. even	c. both	d. neither			
3. 7	The sum	of a matrix with it's tr	anspose is					
		a. null	b. Row	c. Symmetric	d. Skew symmetric			
				•	ž			

5.	The pro	obability	of gettir	ng two s	undays o	on a leap	year is	3		
	a.	$\frac{1}{7}$	b.	$\frac{4}{15}$	c.	3 5	d.	$\frac{2}{7}$		
6.	The eq	uation o	f straight	line par	rallel to 2	2x+3y-9	=0 and	passes thr	ough origin is	S
	a.	2x-3y+	5=0							
	b.	2x+3y-	5=0							
	c.	2x+3y=	=0							
	d.	2x-3y=	0							
7.	The nu a.	mber of 13	terms in b. 11	the expa	ansion (a	$(a+b)^{12}$	is
